Containing the Essential Facts of Holstein Progress

---

Copyright 1922 by James R. Garver, Wisconsin Live Stock Advertising Co., Madison, Wis., Printed in the United States of America.

# Introduction

The facts presented in this little book have been carefully compiled and condensed into their present form with the view of giving the average Holstein man information in which he has always been interested.

All the 30 lb and 1000 lb cows have been listed under their owners, arranged alphabetically according to states. All breeders and owners have been listed alphabetically and given credit for the 30 lb and 1000 lb cows they have bred and those they have developed.

Progress tables have been compiled showing the increase in high record cows year by year. Another table has been arranged giving each state credit for the 30 lb and 1000 lb cows it has bred. This is a very interesting study and throws considerable light on what some states have done for Holstein progress.

The book contains nothing but facts gleaned from official A. R. O. records. We trust our Holstein friends will find them as interesting as we do.

Century sires and sires with more than fifty A. R. O. daughters have been listed and tables compiled showing their progress in the different states as well as from year to year. For the sake of convenience in making up the tables, symbols have been used as follows: O, Owner; B, Breeder; D, Developed; B, Bred.
